**REVTECH**

**CONTINUOUS HEAT TREATMENT SYSTEM :**

**THE ELECTRICAL ALTERNATIVE**

**The association of technical experience and innovation within Revtech combined with our knowledge in the areas of heat transfer, mechanical and electrical engineering and automation means that we are able to bring you efficient and reliable solutions in the following areas of activity :**

- *design and fabrication of continuous heat treatment systems for divided solids and gases (up to 900°C for chemical applications)*
- *installation and commissioning of complete industrial units in the customers plant*

### **Our main customer origins are as follows :**

- *75% on the international market  
(Spain, Italy, Belgium, Holland, Germany, Canada, China, ...)*
- *25% in France*

*cork heat treatment*

### **Our main markets are as follows :**

- **50% in the chemical industry with the following main applications :**
  - Calcination (minerals)*
  - Gas/solid reactions (petrochemical catalysts)*
  - Thermal desorption (rubber, plastics)*
- **50% in the food industry with the following main applications :**
  - Complete steam sterilization lines (herbs and spices)*
  - Roasting (sesame seeds, peanuts)*
  - Special heat treatment of grains (soya beans)*
  - Target volatile molecule extraction (cork, sawdust)*

*flaminga automation*

*chemical products*

*food products*

COME AND DISCOVER THE REVTECH KNOW-HOW IN OUR PILOT PLANT !  
VENEZ DÉCOUVRIR LE SAVOIR-FAIRE REVTECH DANS NOTRE HALL PILOTE !  
VENGA Y DEBCUBRA LOS CONOCIMIENTOS DE REVTECH EN NUESTRA PLANTA DE PRUEBA !
